Known for a uniquely American design aesthetic distinguished by bold colors, ingenious mixes of patterns and relaxed forms, Baratta’s and partner Bill Diamond’s firm was named one of Traditional Home’s “20 Design Icons” at the magazine’s 20th anniversary celebration.

The firm became Anthony Baratta LLC when Diamond retired, and Baratta continued his prolific output providing custom couture for homes, launching a New York boutique featuring one-of-a-kind furnishings, antiques and accessories, and now becomes the sixth well-known designer to apply his talents to a unique line of Capel Rugs.
Biltmore, America’s Largest Home, is located in Asheville, NC. It is known for its relaxed elegance, the legendary hospitality of George and Edith Vanderbilt and priceless furnishings from around the world.

The 250-room French Renaissance Château features striking rugs of many unique sizes, textures and colors. These design elements are sources of inspiration for the Biltmore rug collection by Capel.

**A GUIDE TO OUR PREMIUM PERFORMANCE FIBERS**

From our spinning mill to your home.

Capel braids, our signature product category, represent the heart of what Capel does: unite quality materials with beautiful, handcrafted design. Practical yet indulgent, artisanal yet affordable, Capel braids continue to be a favorite for families 100 years after their debut.

_Wool_  
Sturdy pile, naturally stain resistant, good heat insulation. Wool braids are a prime choice for high-traffic areas, such as living rooms and hallways, or spill-prone spaces, such as dining rooms.

_Cotton Chenille_  
Soft and stable, natural product, fluffy fiber. Popular in bedrooms and sitting areas. A chenille braid can provide a cozy spot in a nursery for tummy time or helping a baby learn to crawl.

_Polypropylene_  
The most fade- and stain-resistant material, extremely durable. Polypropylene is the material we use to make our indoor-outdoor braids. Polypropylene is also a smart choice under a dining table because it is so easy to clean.

_Nylon Chenille_  
Easy to clean, very durable, generally fade- and stain-resistant. Nylon braids are created to mimic the look of wool and high-quality fiber rugs at a lower price point. A great choice if you like to frequently update your style.

_BLEND_  
Secret recipes from our spinning mill, Capelsie. We spin our own yarns in our Capelsie mill and that gives us the ability to create our own custom yarn blends. Sometimes the secret ingredients include wool for durability and toughness or nylon for resilience and suppleness.
We offer standard and custom shapes and sizes in each of our American-made braids.

ISOBEL

Our jute Isobel collection is based on a playful and vibrant end paper from the Colonial Williamsburg archives. Endpapers were often used in the 17th and 18th-centuries to decorate the inside covers and first and last pages of prized books. Marbled papers were extremely popular, although geometric shapes, fantastic birds, floral touches and mythical creatures were often featured as well. Let inspiration from one such paper, with an exuberant floral pattern, add a light-hearted flair to your room.

OUTDOOR RUGS
EVERY RUG NEEDS A PAD.

A primer for picking the perfect pad for the job.

FIRM GRIP™ #8210
Best on hard surfaces or carpet. Our plushest feel underfoot. Extremely dense padding for use on hard floors and over carpet. Non-skid traction secures rugs. Total support for all types of rugs. Recommended for heated floors.

RUG GRIP® #8250

SUPER GRIP™ #8340

CARPET GRIP® #8330
For a rug on wall-to-wall carpet. Provides maximum grip and protects against dye transfer. No bulges to catch heels. Cuts to rug shape with household scissors. Requires no taping or seaming. Antimicrobial—guards against mold, mildew and odor-causing bacteria. Not for use on heated floors.

LOK-LIFT™ #8341
Provides non-slip safety for braided stair treads. Rug grip designed for use with Capel Braids—American Originals’ 8” X 28” braided Stair Treads. Standard 6” X 25” roll is included in the package; roll underlays 11 stair treads. Using scissors, grip should be cut 1” smaller than the outside of the stair tread. To install, simply place grip sticky-side down on a clean stair, remove the adhesive strip from the top of the grip and place the stair tread on top. Not for use on heated floors.

THE SAME STANDARDS OF CRAFTSMANSHIP APPLY TO OUR PADDING.
